SUMMARY

Software engineer specialising in **generative AI** and **full-stack development**. Experienced in LLM agents, speech and video models, and cloud infrastructure. Independently delivered AI platforms used in education and at live events. Brings strong product and design sense across UX, motion and audio.

EXPERIENCE

Software Engineer Sep 2025 – Present

See Change Education / Asia Allied Group *Hong Kong*

- Architected an **AI video generation platform** in Python and FastAPI that turns a prompt into a narrated, animated 4K video using multi-agent LLM workflows and **self-hosted GPU inference**; cut generation time by **50%**.
- Developed an **AI photobooth** in React and Spring Boot that restyles photos with prompt-engineered OpenAI and Google image models and a **live voice agent** on Azure Speech and an LLM; served **200–300 guests** per event, now a product for schools.
- Engineered an **AI lesson generation pipeline** that turns recorded classes into videos, slides, bilingual subtitles and exercises using prompt-engineered workflows on self-hosted NotebookLM and AI slide servers, powering production of a 32-lesson course with per-lesson production time cut by ~**80%**.
- Automated **Zoom recording backup** to AWS S3 for every class this year, with lesson matching and attendance tracking, freeing **150 GB** of Zoom cloud storage.

Full Stack Developer (Part-time) Nov 2025 – Jan 2026

852HealthKare *Remote*

- Created an **AI workout planner** in Vue and MongoDB, cleaning and indexing a **1,000+ exercise** open-source dataset to generate personalised plans and guide each session with voice and animation.

AI Engineer Intern Jun 2024 – Jul 2024

Seth Biotech *Hong Kong*

- Extracted pulmonary nodule details from CT scan reports into structured JSON at **95% accuracy** using **local LLMs** with Ollama and LangChain, keeping patient data on-premises.

PROJECTS

Culinary Companion — hands-free recipe app built with React and browser-based computer vision, controlled by hand gestures and voice commands, with spoken step-by-step guidance.

SKILLS

Languages: TypeScript, Python, Java, SQL

Frameworks: React, Next.js, Vue, Spring Boot, FastAPI, Node.js

AI: AI agents, LLM orchestration, prompt engineering, MCP, text-to-speech, image and video generation

Infrastructure: AWS, Docker, Nginx, Linux, REST APIs, MySQL, Redis, MongoDB

Practices: Agile/Scrum, Git, Jira, unit testing, code review, CI/CD

Design: UI/UX, motion design, video production

EDUCATION

B.Sc. Computer Science, Minor in Data Science Aug 2023 – Aug 2027

City University of Hong Kong · CGPA 3.38/4.30 *Full Tuition Scholarship*

Relevant coursework: Software Engineering Practice, Software Design, Data Structures, Algorithms, Database Systems, Operating Systems, Computer Networks, Multimodal Interface Design
